RESEARCH

Explaining the Fertility Crunch: The Roles of Intergenerational Income Mobility and Shifting Preferences (research in progress)

- Dynamic overlapping-generations model with cultural transmission and Markov income mobility shock on preferences
- Steady-state equilibria and counterfactual policies using numerical simulations.

Dynamic Voting over Pensions with Endogenous Fertility (research in progress)

- OLG model with heterogeneous types where agents choose fertility and vote over future pay-as-you-go pension taxes, taking into account how policy affects the size and composition of future cohorts.
- Politico-economic equilibria and steady states, highlighting demographic externalities and the trade-off between current pensions and future population size.

TEACHING & EXPERIENCE

Graduate Student Instructor

EC370 Money and Banking

University of Oregon

2024 Fall & 2025 Fall

- Lectured with new course material, modernizing course offering.
- Taught students fundamentals of banking, monetary policy, and advanced topics such as shadow banking, financial crisis, QE.

Research Intern

East-West Center Washington D.C.

- Authored policy-oriented articles for the Asia Matters for America Initiative translating detailed trade and investment data into accessible narratives (articles available at asiamattersforamerica.org)
- Collected, cleaned, and analyzed large county-level and macroeconomic datasets for the *ASEAN Matters for America* publication, constructing indicators on trade and economic linkages.
